

### Protecting You

The above establishment invests in the health and safety of its patrons and employees by utilizing ENVIRO-MASTER SERVICES

#### **VIRUS VAPORIZING SERVICE.**

To prevent the spread of disease, this area has been disinfected by ENVIRO-MASTER SERVICES' certified health and safety technicians. Virus Vaporizing using an electrostatic sprayer is 99.999% effective in killing bacteria and viruses with an EPA registered, hospital grade disinfectant. This state-of-the art technology addresses dangerous disease-causing pathogens and is uniquely designed to protect you.

For more information contact your local Enviro-Master at 855-504-9443

## Covid Mitigation Measures

We go the extra mile to make sure you are safe. Here are just some of the extra steps we are taking:

- We hired Enviro-Master to come to the restaurant every week and perform their Virus Vaporization Service on our entire facility (see above)
- We installed ultra violet light scrubbers in our air ducts that are designed to kill airborne viruses

- No seating or standing at the bar
- Tables are spaced 6 feet apart with very limited seating capacity, but a lot of space
- Everyone must wear masks except when seated at their table
- We accept a maximum party size of 6 people at 1 table unless everyone is from the same household. Larger parties are still welcome, but will be separated into tables of 6 and spaced according to social distancing guidelines
- We utilize contactless QR Code Menus
- We sanitize our tables between each seating with an all-natural viruscide spray

**SAFETY IS OUR  
NUMBER ONE PRIORITY!**
